## Mind Based Research and the New Modality for Antimicrobial Therapy

Doctor Simon Raymond BMedSc (Hons), MD

Harvard University and Monash University

### ABSTRACT

Simon Raymond has been working on three topics: (1) invention of the cure for HIV and new mechanism for antimicrobial therapy site attachment inhibition; (2) scientific understanding of consciousness; (3) Mind abuse and IP theft.

### \*Corresponding author

Simon Raymond, Alumnus of Melbourne University, Australia.

**Received:** April 01, 2023; **Accepted:** April 12, 2023; **Published:** April 15, 2023

### Site Attachment Inhibition and Cure for HIV

Antimicrobial therapy has to date consisted of a mechanism targeting cellular replication of the infective agent. The current author conceptualised prior to 2000 the new modality which he has termed site attachment inhibition (recent advances in clinical trials). This involves negating cellular attachment by the infective agent to the human cellular biology. For HIV, the current author invented glycoprotein inhibitor drug therapy negating attachment by the virus to the cellular surface glycoproteins and the result was curative. The researcher has also been working on the same for other infectious disease including Ebola virus.

The researcher has also invented stem cell therapy (embryonic) involving mutagenesis and knockout of the CCR5 gene (receptor). Due to association versus causation issues, a second receptor required knockout and this resulted in immunity. This therapy has been termed by the researcher as transfer inhibition.

The current researcher received hostility when stating to certain doctors that he was banning them from the drug and stem cell therapy. For this reason, the researcher may no longer bring them out and is leaving Australia.

The researcher believes that inventors should have control over who receives their invention as it implies control over their mind and views it as mind abuse to be denied of that. The researcher views it as a crime for others to take the research further.

### Scientific Understanding of Consciousness

The current researcher has been indexed by Harvard as inventing downloadable consciousness: final reference.

The human brain functions by way of Newtonian physics. Consciousness functions by way of quantum physics. The researcher demonstrated his understanding of consciousness:

(a) Depth perception occurs through measurement of distance

between peaks that result from constructive interference (superimposition) of the waveform. This is In comparison to Newtonian physics which states that depth perception is a result of concepts including texture gradient, interposition, relative size etc. (b) Newtonian physics described the application of the pinhole aperture to increase visual acuity by way of only allowing the central beam to traverse the optical system and unhindered by refractive problems. Quantum physics explains this by collapse of the waveform into particle form and subsequently light hitting the retina in a more concentrated form, thereby increasing visual acuity.

The researcher notes that to protect his IP he is not disclosing whether perhaps application of the pinhole increases diffraction. The researcher has demonstrated his understanding of consciousness describing previously understood Newtonian mechanisms using quantum physics.

### Mind Abuse and IP Theft

Certain countries including Britain, Australia, USA and Italy have been involved in the Head of Church (nazi) government structures indicative of illegal world war government type setups. This implies mind abuse as that is one core element of such abusive structures [1-12].

The current researcher has shown that IP theft is also occurring as a result. The current researcher has had gardasil and crispr stolen.

With respect to crispr and gardasil, RACT reports the research to span back to before the year 2000.

### CRISPR

The researcher was the furthest ahead in 2018 including top ten ranked IOSR and presented globally. Ahead of USA national library of medicine NLM (links provided inside of the following publication links):

The nobel prize was not awarded until 2020 for crispr to british

Where the illegal head of church is occurring:

<https://www.nobelprize.org/prizes/chemistry/2020/popular-information/>

The inventor of gardasil is also british or scottish and the researcher has provided evidence to this journal that it was stolen from Dr Simon Raymond.

It is absolutely clear the theft occurred and is illegal:

Dr Simon Raymond is indexed by Harvard University as the first to invent downloadable consciousness and said that these people and their descendants won't be viable:

[https://hollis.harvard.edu/primo-explore/search?search-banner-input=downloadable%20consciousness%20simon%20raymond&tab=everything&vid=HVD2&lang=en\\_US&offset=0&query=any,contains,downloadable%20consciousness%20simon%20raymond](https://hollis.harvard.edu/primo-explore/search?search-banner-input=downloadable%20consciousness%20simon%20raymond&tab=everything&vid=HVD2&lang=en_US&offset=0&query=any,contains,downloadable%20consciousness%20simon%20raymond)

Note:

Dr Simon Raymond's biography originally said indexed by Cornell University but you may notice he is no longer. This is simply because Cornell said Dr Simon Raymond is too good and their view should be indexed by Harvard University only. An example is above but also below:

Academics who simply say indexed by a university are frauds. They have to show they are at that level for instance too good for lower ranked universities the way Dr Simon Raymond has shown.

[https://hollis.harvard.edu/primo-explore/search?query=any,contains,IOVS%20simon%20raymond&tab=everything&search\\_scope=everything&vid=HVD2&lang=en\\_US&offset=0](https://hollis.harvard.edu/primo-explore/search?query=any,contains,IOVS%20simon%20raymond&tab=everything&search_scope=everything&vid=HVD2&lang=en_US&offset=0)

[https://hollis.harvard.edu/primo-explore/search?query=any,contains,site%20attachment%20inhibition%20simon%20raymond&tab=everything&search\\_scope=everything&vid=HVD2&lang=en\\_US&offset=0](https://hollis.harvard.edu/primo-explore/search?query=any,contains,site%20attachment%20inhibition%20simon%20raymond&tab=everything&search_scope=everything&vid=HVD2&lang=en_US&offset=0)

If at any stage Dr Simon Raymond leaves Harvard it is because he is too advanced and an email correspondence regarding this will be provided to this journal.
