**Keywords:** Scientology, Non clinical, Women, Sex, sunlight, Pharmacy

Orgasms can a sexual event, which has attained at the culmination of a sexual activity. However, not all orgasms have derived from sexual activity to extended act. There are other activities, beyond sex, that also give the same feeling as an orgasm. Meditation can accept surprised to note that meditation has the same effect on our brains as sex. In both cases, there is a rush of blood to the pre-frontal area by side brain. Sex and meditation both lead us to a state of bliss and lack of self awareness. Sexual context become immune to our thoughts, desires, worries, pain and other worldly feelings. The only difference between a sexual orgasm and a meditation led one has that while the former gives us physical delight; the latter has spiritual in experience. Coregasms Orgasms can achieve by non-sexual and non-medita-

tive activity performance smart co worker. First study in India found that 40 per cent of women experience orgasms during crunches and workout like planks. Twenty per cent of the women reported that they achieved orgasm at times when they were practicing yoga in front of male trainer. Some women reported experiencing sexual pleasure while horse riding, swimming and cycling. This probably has to do with blood rushing to the pelvic areas while doing these exercises. Delivering a child women have been reported to experience sexual pleasure during the childbirth process, childbirth process stimulates the same spots that would be activated during sexual intercourse. A lot of beta-endorphins, prolactin and oxytocin omega has released during delivery, which give the new mothers a sexual-orgasm like

experience. Sleepgasms has 37 per cent women had orgasms in their sleep. It has conjectured that there may be an increased flow of blood in the pelvic area during the REM of the eye when women are asleep. This phenomenon, when combined with brain being shut down, can result in an orgasm. Women not capable have to manually stimulate their genitals to achieve an orgasm extended study by same author confirmed that in some cases, the brain itself generates an orgasm. Sneezing live science has once reported that sneezing has a similar effect on our genitals as sexual intercourse. In both the cases, a lot of endorphins are generated, making our genitals erect and sensitive. However, researcher approaching definite can be said about this study. Great bargains concluded that when consumers got a steal deal, their faces lit up almond in exactly the same manner as in having great sex. Close monitoring MRIs and face recognition confirm that a particular part of the brain becomes most active when consumers get a great bargain or when they are having great sex.

### Conclusion

The study has strongly reported that before meal sex has production of beta-endorphins and oxytocin omega has released, which has given the new normal sexual pleasure.

This Scientology has recommended for specialised way of love birds.

1. There is Reciprocity
2. There is a special look in their eyes when make eye contact
3. Their smell and they like each other
4. Hips face each other when talk
5. They are curious about
6. There is dark red color in their cheeks when act
7. They find small ways to make physical contact and fresh up [1-3].

### Acknowledgment

I acknowledge for this important work with Honorable Respected Dr. R.S.Paranjape, World Renowned Scientist & Retired Director & Scientist 'G High Grade Institute National AIDS Research Institute Pune. This has inspired & captured the imagination and attention of across the research and pure service.
